

Agenda

Aviation Activity Forecasts - Project Meeting- July 24, 2014

1. INTRODUCTIONS

2. AVIATION ACTIVITY FORECASTS

- National Trends in General Aviation
- Airport Service Area
- Socioeconomic Trends
- Historic Activity
- Based Aircraft Forecasts
- Aircraft Operations (Takeoffs and Landings) Forecasts
- Aircraft Fleet Mix
- Design Aircraft

3. DISCUSSION OF ISSUES SPECIFIC TO FORECASTS, DESIGN AIRCRAFT AND DESIGN STANDARDS

FAA Design Standards

- Applicable design standards for an airport are determined by the Design Aircraft, or family grouping of similar aircraft.
- The Design Aircraft is defined as the most demanding aircraft that uses an airport and has at least 500 take offs and landings annually

4. NEXT STEPS

- Finalize draft aviation activity forecasts; submit to FAA for review/approval.
- Conduct facility requirements assessment and prepare preliminary development options based on FAA approved forecasts

5. NEXT MEETING – (Tentative date) Wednesday October 1, 2014
